**CROWD  
MANAGEMENT**  
*REINVENTED*

## Skiplino At A Glance

---

**Skiplino** is a cloud-based system providing a variety of products to manage crowds and an advanced digital service experience that aims to save people's time. It also gives our clients an unprecedented view of branch activities and detailed data, which helps them better manage quality control and customer satisfaction.

The team at **Skiplino** believes that life is way too short to waste your time in queues. **Skiplino** greatly reduces the amount of time people spend waiting in line at banks, telecommunications companies, financial institutions, and any other facilities that utilize traditional queue management systems.
