Natural Body Care Since 2006

Green Bar natural body care is a cultural dialogue. The ingredients we tap into always have a story of the east to share. Integrating stories of time and place; and materializing an eastern dream into something tactile we can experience through beauty.

We hope that the integrity of the slow method, and our discernment with ingredient selection in manufacturing, inspires a thoughtful well-lived, and well-loved life.

Made with spring island mulberry, licorice, and fig leaf.

The skin is profoundly affected by environmental and dietary oxidative stressors due to our fast-paced life, pollution, and stress. This can cause pigmentation, dryness, and deepening lines.

At Green Bar, we believe it is impossible to detoxify skin using conventional ingredients that continue to add to the problem! Intensive Antioxidant Repair takes a non-toxic approach, using different “energy” to solve the problem, bringing your skin back into balance.

Our ingredients include native plants that have not been touched commercially and are harvested seasonally, providing a high level of nutrients. The fruit antioxidants are combined with oil from seeds that contain essential fatty acids to restructure damage from inflammation. This formula holistically helps the skin to resist all oxidative damage, whether from the sun, pollution or stress.
