# INTRODUCTION

FOOSCO was founded in 1983 initially with the purpose of providing healthy meals and snacks to school children. Over the years the company has diversified and grown to be among the leading food and beverages manufacturing and catering companies in the Kingdom of Bahrain. The catering side of the business has been operating canteens in a large number of government/private schools and corporations.

The manufacturing side of the business is responsible for the manufacture of a wide range of sandwiches, fruit juices & drinks, ice lollies, natural potato chips, extruded and pellet snacks. These products are produced under the highest hygienic conditions through the use of the latest state of the art machinery. In keeping up with our rapid growth, a new USD 8.0 million-dollar manufacturing facility (Branch 2-) has been constructed on a 7000 m2 area at the Bahrain International Investment Park (BIIP). The manufacturing of natural potato chips, extruded and pellet snacks have commenced in this ultra-modern, state of the art plant which utilizes fully automated equipment from Netherlands, Germany, UK and Japan.

Our brands Megachips, XO and Krunchex have received a tremendous response from the local market, GCC countries, and beyond. No expense has been spared to ensure that we are able to deliver the highest quality products to our customers. We source the best quality raw materials from around the world to preserve our product's remarkable taste. In validation of our food safety and quality measures, we are fully compliant with TUV Nord, Germany for ISO: 22000 and HACCP certification.
