Almond Chegan Firm – Blackseeds Net Weight (Approx.) 170g

Jomon produces a wide range of products between firm, creamy and soft Chegan as well as spreads and dips that are mostly cashew and almond based.

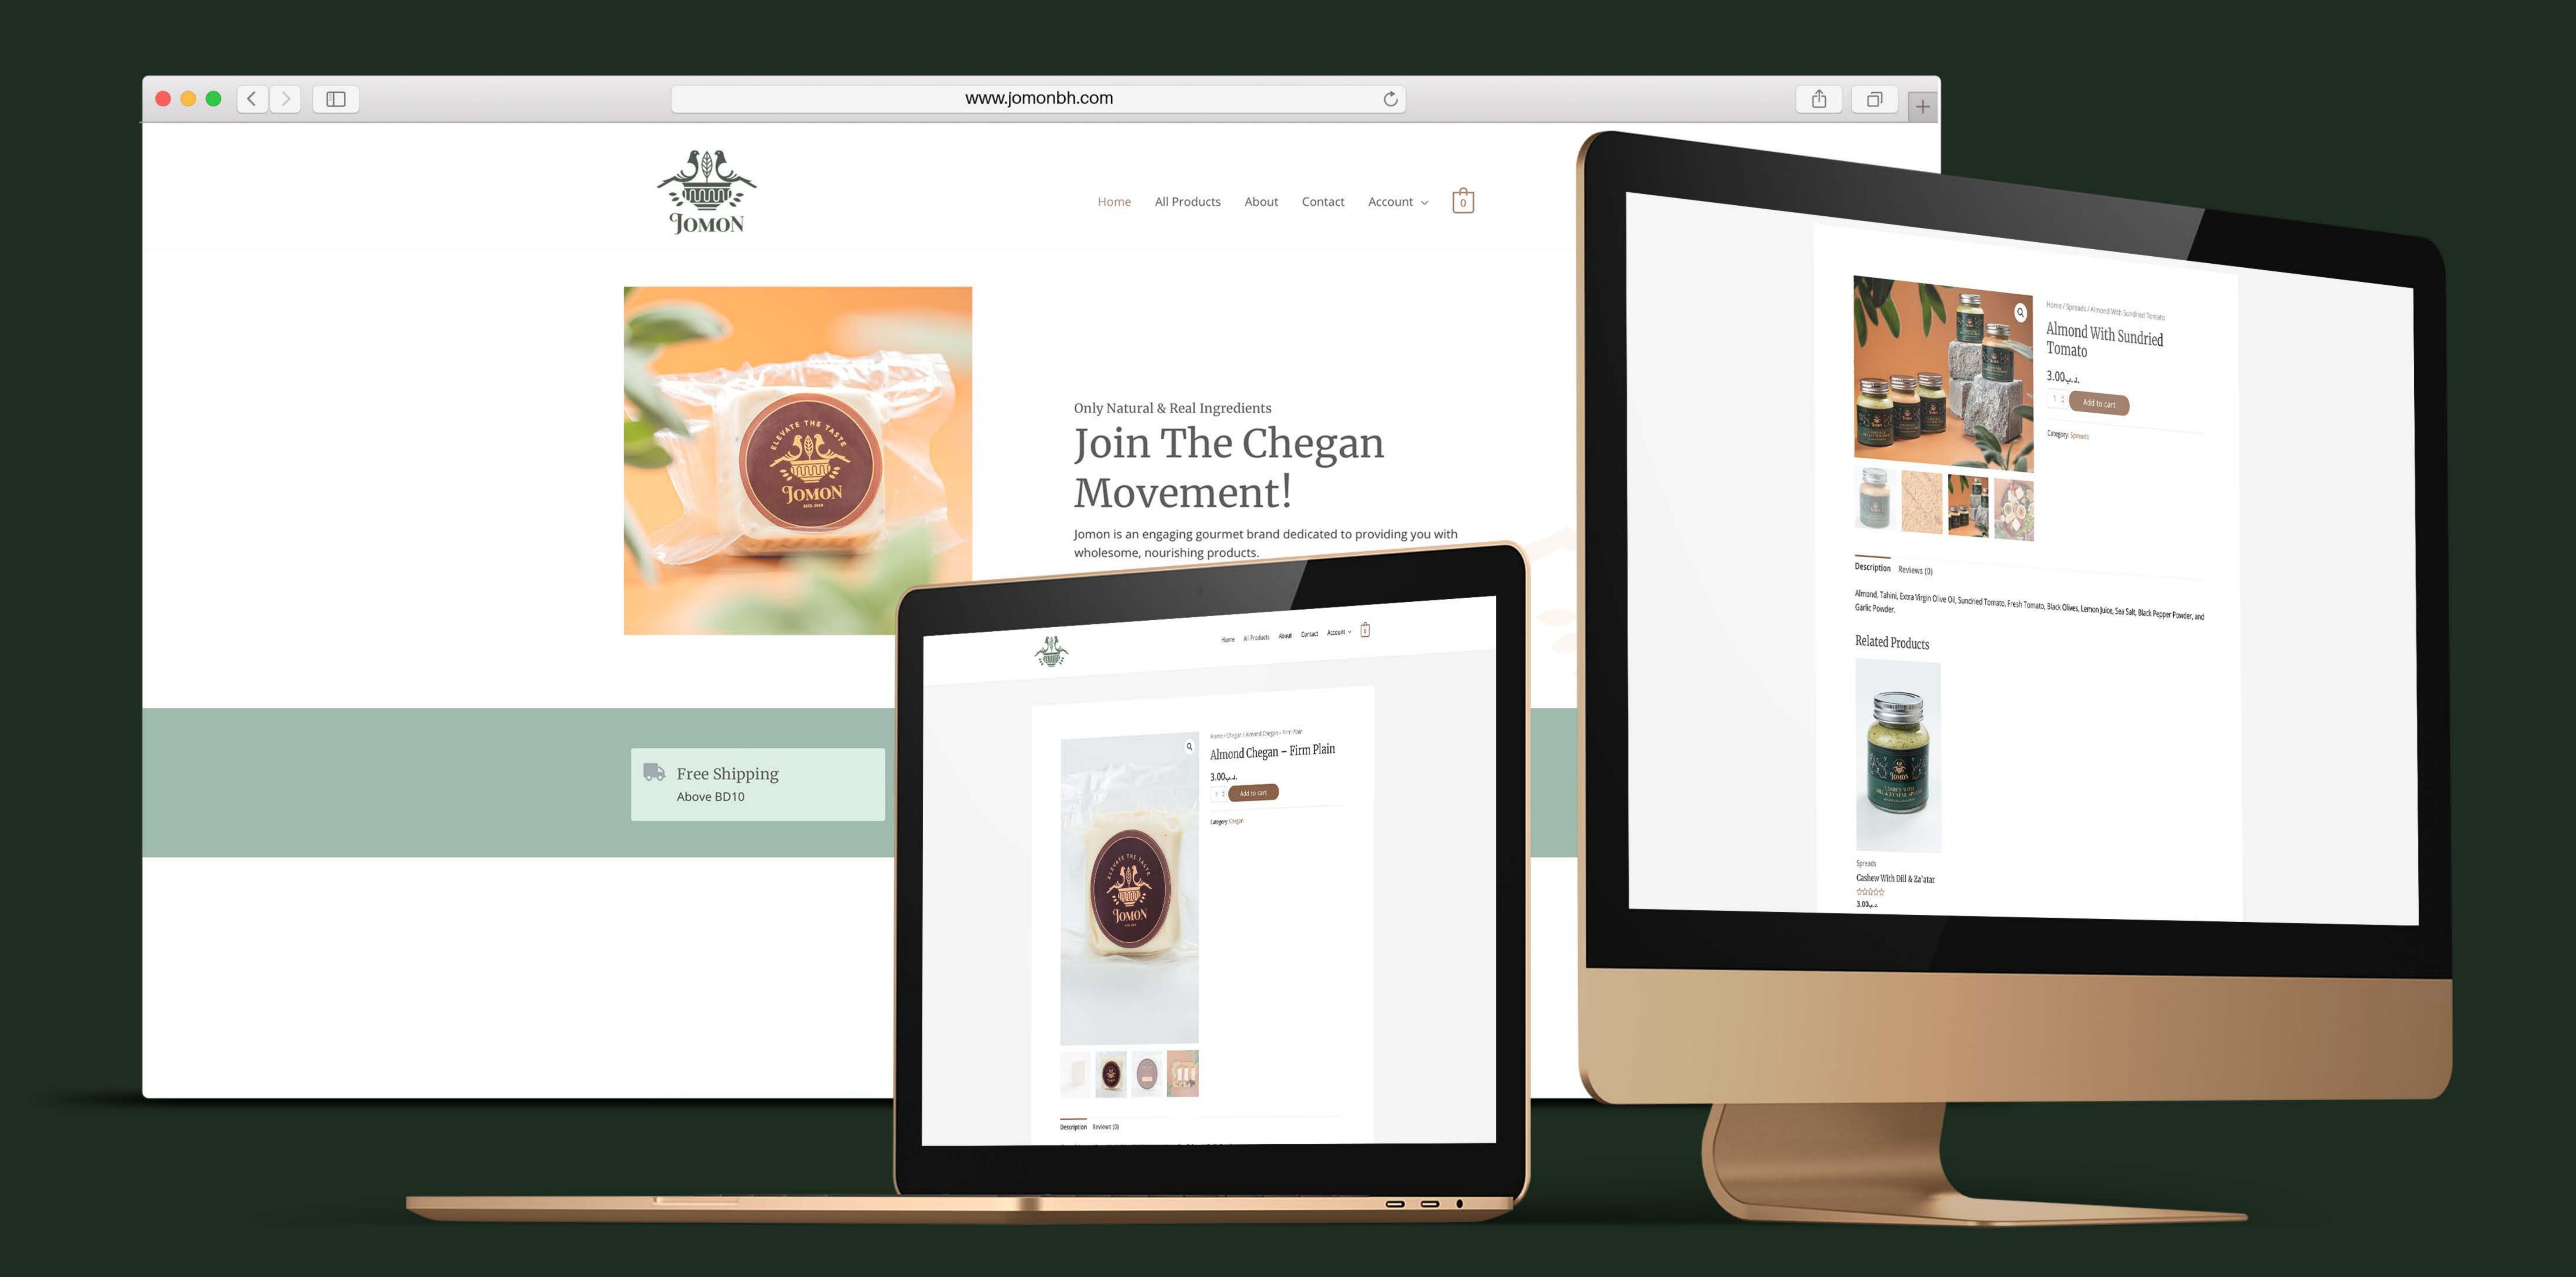

# JOMON POS

The official launch of the website was in February 2021. In March 2021, Jomon's best selling products is distributed in 7 retail outlets to cover all areas of Bahrain.

# JOMON STRATEGY

Jomon's strategy includes B 2 B collaborations with other businesses in the entertainment, food and beverage sector.

For example, Jomon may supply restaurants with its products as raw material in their pantry.

Based on research and market study, along with the current demand on such products, Jomon is looking forward to cover wider range of Bahrain consumers. At Jomon we are planning to expand within the region and eventually go with the brand to the international market.
